

JUDGES COMMENTS

DOBERMAN PINSCHER CLUB OF AMERICA

80TH ANNUAL CONVENTION & NATIONAL SPECIALTY

October 10-15, 2005

Dr. May S. Jacobson - Best of Breed Competition

It is always a thrill to judge the National Specialty. The 2005 was no exception. I have to say the last time I judged Intersex at the 1997 National at Del Largo we had torrential rains and it was hot and humid. This year the weather was lovely. I could not have managed my ring without my super stewards Judy Smith and Sam Burke. Thank you.

My first group of dogs was my Veterans dogs and bitches. I was glad to see them divided by age. The classes were high quality. Each was in good health and aging very well. The oldest was 12 years old. The best male veteran was in excellent condition, moved well and was outstanding in his class. The bitch also was very lovely with good proportions. They showed with nice intensity.

My specials class had many good dogs however; there were many different types. The sizes varied from medium to large. Many males in the preferred medium range appeared more feminine due to lack of bone. The lack of bone and substance is a problem in bitches as well as in males. Many were unbalanced that is, the rears were very over angulated and the fronts were relatively straight and upright. In order for these dogs to move with some reach and drive they compensate with longer backs. We see many dogs that have extremely exaggerated forechest. This has no functional value for a working dog. It hinders agility. Again we see this in both

bitches and males. We forget that our breed is a working dog whose function requires a medium size compact dog with good bone and substance. For the first time in many years toeing-in is appearing in some of our excellent Dobermans. I did not use these dogs.

We still need to work on heads. There were many with good expression but lacked underjaw. Again, this is important for a functional working dog. There were many round and light eyes. Most of the mouths were good with just a couple questionable bites. Temperaments for the most part were good.

Once I made my cuts the selections of the top Dobermans was very exciting. My Best of Breed was a red male with good musculature and very masculine looking. He had good bone and substance and moved nicely. His condition gave him an appearance of smoothness yet elegant. My Best Opposite was a lovely young bitch. She was also red. She was smooth and fit as one piece even when she moved. She does need a little more maturity. I was pleased with my Award of Merit dogs.

I am very grateful to the owners and handlers for presenting these lovely specimens to me. Once again thanks for the honor. ▲

May Jacobson

Mrs. Darlene Young - Regular Classes

First of all I would like to say that I was extremely honored to have been selected to judge at the DPCA National. This is a special thing for any breeder judge to be able to judge that many good dogs.

In general I felt the dogs were better than the bitches. There were a lot of missing and extra teeth in the bitches which really surprised me as I've not seen this problem in our breed in a long time. Another problem with teeth is that they are getting too small and the occlusion is not good on many of our dogs. We also need to watch the length of backs and the over angulated rears that seem to be cropping up on our breed as well as the flat croups with upright tails. These faults are getting better but they were still prevalent in the ring at the National.

Dogs in general were compact and smooth with good shoulders and many with good rears. There were a few with over angulated rears but not as many as I've seen in the past. Size was of concern to me; it seems that many dogs were over the ideal in height. The Winner's Dog was a very balance compact dog. He was of medium size and very smooth with great shoulders and an excellent rear to balance off the front. He moved freely with great side gait. His feet were very tight and his eye was dark. The Reserve Winner's Dog was also a compact and smooth dog with great presence. He was striking and had excellent intensesness and focus. He had a very good side gait, dark eye and beautiful head. My 9-12 AOAC Puppy dog would have been another choice in winners and was also very deserving of getting the nod. He had great show attitude and his movement was impeccable. I enjoyed doing dogs and felt honored to have had such a nice entry.

Stud dog, WOW, what a dream to have a ring full of nine beautiful stud dogs and their get. I agonized about how to judge this class for months before my assignment. There could have given at least five first place ribbons in this class. There were dogs sent out

of the ring that under different circumstances would have won the class. The winner was a medium size compact dog that definitely passed that type on to his get. He had wonderful presence and his get looked like replicas of each other. This dog and the next three placements, I would definitely consider in any breeding program. The second, third and fourth place team were of very good quality and deserving of a win. All produced redeeming qualities in their get as well as producing good some with improvements over them as stud dogs. There was very deep quality and it was a wonderful class to judge.

Puppy bitches was the toughest part of my assignment. The first class came in to the ring and I could tell it was not going to be an easy one to judge. There were many different types in this class. I found in many of the bitch classes a variety of different types, not a lot of consistency which made judging them even more difficult. My 6-9 AOAC bitch was of excellent quality with great side gait with clean up and back movement. She had wonderful curves without being overdone. She was very balanced and compact. I was pleased to see her go RWB in the bitch competition. The second place bitch in that class was also very beautiful and showed a lot of balance and great movement. In the 9-12 AOAC class there was another very nice representative. This was a blue bitch with very nice angles. She was compact, medium size and also had clean up and back movement with good side gait. Again, the second place bitch in this class was equally nice and it was very close in my decision.

Thank you for this honor and making one of my dreams come true. ▲

Darlene Young

Ms. Esther M. Urso - Futurity Juniors

This was my second time to judge the Futurity Junior Class again, and I really enjoyed every minute of it. My thanks, again, to everyone that trusted my ability to judge their dogs. It was a real honor and pleasure.

I was very proud to have judged a wonderful group of dogs, although, at this particular age, I found that some were lacking muscle tone and on their movement, did not have enough reach and drive, but, they were still good enough to win. As you can see by my placements and my Best Puppy and Best Reserve Puppy – they can speak for themselves.

My thanks to all the exhibitors who were so courteous to me in the ring, regardless of their placements. I really appreciate your sportsmanship.

It was also very nice to hear good comments from the spectators outside of the ring – agreeing with my final decision – which is so hard to believe, as I see the dogs so much differently judging on the inside of the ring. Very interesting, but, so nice to hear!!

Last, but not least, I would like to thank Judy Smith, and Rick George for the great job of keeping me on my toes and making sure things ran smoothly.

Great job!! ▲
Esther Urso

L. Michelle Lewis - Futurity Puppies & Grand Futurity

I want to thank you all for having the faith in my ability to judge the future stars of our Doberman breed. I was honored to be chosen to Judge these youngsters in Houston. I will write a few comments of what I saw in the ring. It is always easy to judge outside the ring and ask why did so and so do that, well inside the ring when you have your hands on these puppies you look at them all in a different light.

I had a friend take photo's of me in the ring judging. When I saw the photo's of myself in the ring with the stern look on my face, I thought you look so mad, I am here to tell you I was not. I was so into judging these stars of the future the look on my face was of intense looking and judging every one as individuals. When the day was done, I was exhausted.

The overall quality of the puppies was better than I had judged in 1996, where I had judged the Juniors. In Colorado, I judge the host club sweeps so I have something to compare with. The overall quality of my boys were better than the overall quality of the bitches IMHO. I found few that had all the qualities the standard calls for. If I had it in the class, I found it. I thought the overall balance of front to rear was better than past years, not so much sweep in the rears. We still have the straight front problem. Not too much reach and drive because, when you are not balanced front to rear you cannot move with the

reach and drive I like to see. The size of the puppies in height was good, the condition of the puppies was good, I would like to see more natural muscle, especially in the rear, the coat colors were deep and rich in all classes. I saw some heads lacking in underjaw and too narrow, more like a collie head, We need to improve in this area. I saw some missing teeth but not a lot, the bites were for the most part good.

When the day was done I had chosen as my Grand Prize Futurity puppy, a very correct to the standard, red puppy bitch that was just 6 months and a few days old. She, I could have taken home in a heart beat. To me she met the standard in every way. She was short coupled, had a lovely shoulder layback, good bone, tail set that was correct, an extension of the spine, cat feet and she had a full and correct mouth. This puppy could also move around the ring with reach and drive. It was an honor to have judged her as well as all my other puppies. I wish I could have had more placements in the classes as IMHO, the classes were deep in quality. I wish all the puppies that were shown to me much success in the ring, it was an honor to judge you. ▲
